

SLITTER TOOLING CABINETS

Protect Your Tooling

Slitter tooling stored in custom cabinets is protected from damage by accidental contact with other equipment, tooling and personnel. The **sharp edges of slitter knives are all safely contained** inside the cabinet. Tooling is enclosed in a dry environment where rust will not deteriorate the carefully prepared surfaces.

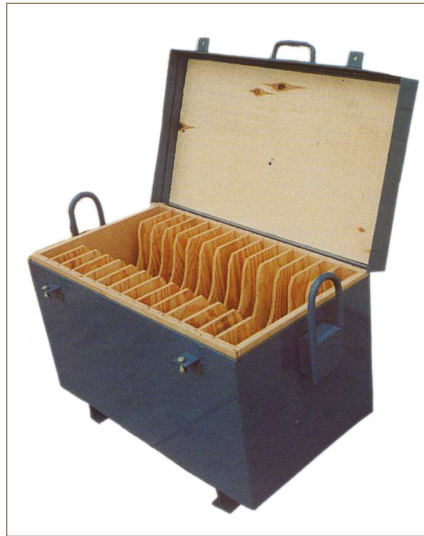

Ready access to your entire inventory of slitter knives and spacers, stored in an organized progression of sizes, will **save time in preparing tooling for changeovers**. By an inspection of the cabinet with service markers in each empty slot, you know which ones are out being sharpened.

Products include:

- ➔ Tooling Racks /Tables
- ➔ Knife Storage Boxes
- ➔ Spacer Racks /Tables
- ➔ Shear Blade Racks
- ➔ Packaging / Sorting Tables
- ➔ Squaring Tables

SLITTER TOOLING CABINETS

Protect Your Tooling

- ➔ Each storage cabinet is custom built to store and organize slitting knives, spacers and related hardware specific to your operation.
- ➔ Cabinets are designed to fit in the space that you have available and appropriately sized to the number and size of components you have to store.
- ➔ Cabinets are durable, solidly built and color matched to your equipment for a professional look.
- ➔ Slitter knife storage cabinets are fabricated from 7- and 10-gauge steel with plywood liners to protect knife edges.
